HEALTH CARE

Dear Parent/Guardian,

Robins Hockey Club would like to ensure that team coaches and managers are aware of any health issues your players may have that may cause concern throughout the hockey season eg: asthma. We would like to ensure that in an emergency medical issues can be dealt with effectively. **It is important to remember, however, that at all times parents/players are responsible for their child's/your medical conditions and if they have any concerns they need to remain in attendance at training sessions and games to ensure the health and well being of their child/you.** This form is only an opportunity to share this information; Robins Women's Hockey Club cannot take liability for health concerns.

Please find attached the **Health Care information sheet.**

Please complete, sign and return this form if your child/you has any medical concerns that you feel it is appropriate for your team coach and manager to have information about.

Please list any prior and current health issues and on going treatments which may affect your child/you:

eg: Asthma – give 5 puffs of ventolin if child becomes breathless. Ventolin kept in top pocket of hockey bag.
